TECHNOLOGY · SYSTEMS · AUTOMATION

We build the system that run your business behind the scenes.

Websites, CRMs, ERP systems and business process automation - built around how your business actually works, not a template.

Book a Discovery Call

Who we are

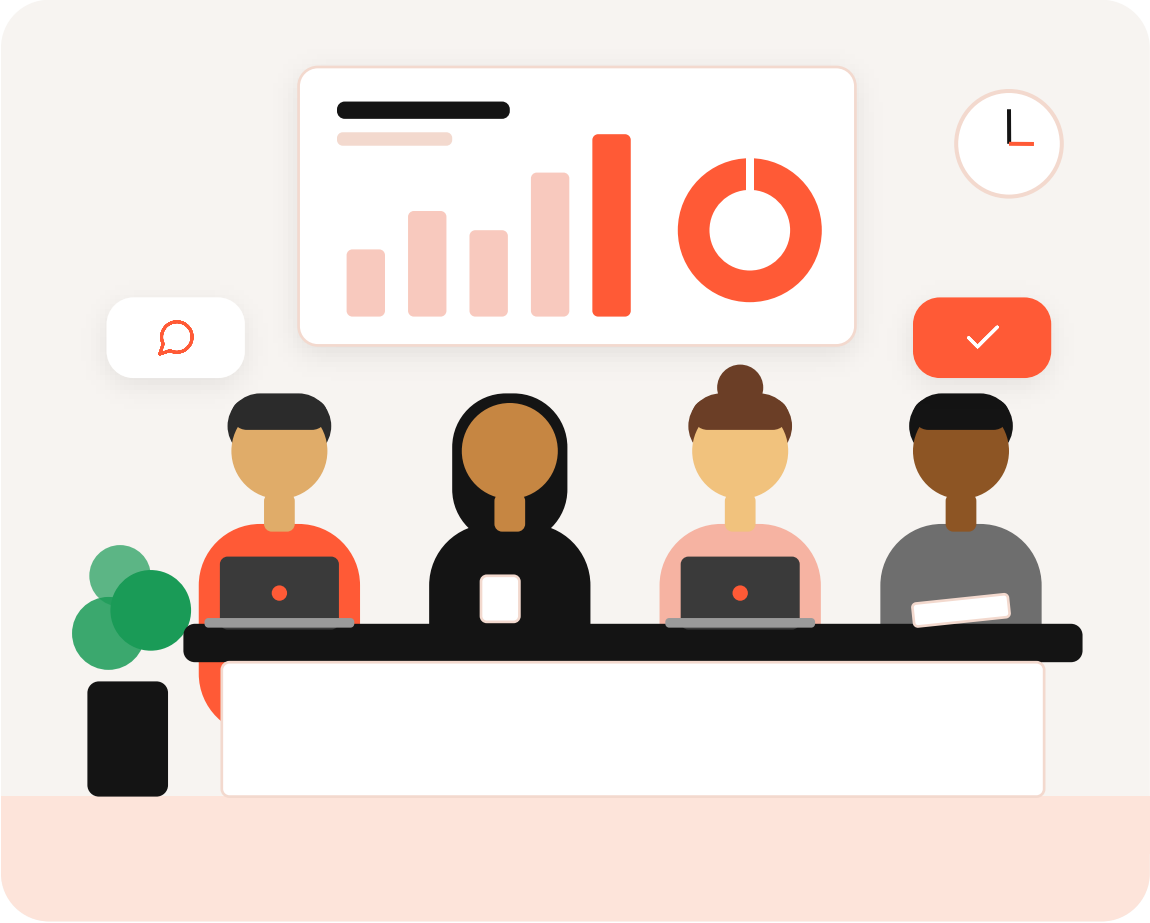

The technology arm of Vertex

Vertex Tech House is the technology arm of Vertex — a team of developers, designers, and automation specialists who build the digital backbone businesses run on.

We design and build websites, CRMs, ERP systems, and process automations tailored to how your business actually operates — not boxed into a template that forces you to adapt to it.

From the first discovery call to post-launch support, **one dedicated team carries the project end-to-end** — no handoffs, no vendors pointing fingers at each other.

Four services, one roof

Everything your business runs on — designed, built and supported by one team.

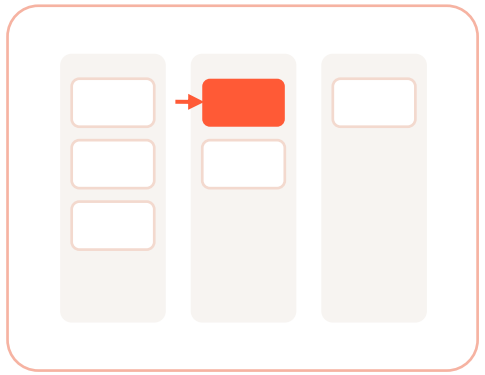

01

Website Development

Fast, modern websites built to turn visitors into customers.

- Business & store sites
- Web apps & portals
- SEO-ready builds

02

CRM Development

A custom CRM that tracks every lead, deal and customer — your way.

- Lead & pipeline tracking
- Sales automation
- WhatsApp & email sync

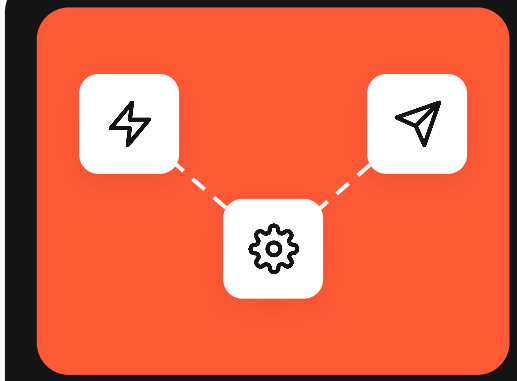

03

ERP Systems

One system for inventory, finance, HR, payroll and operations.

- Inventory & purchase
- Finance & accounting
- HR, payroll & attendance

04

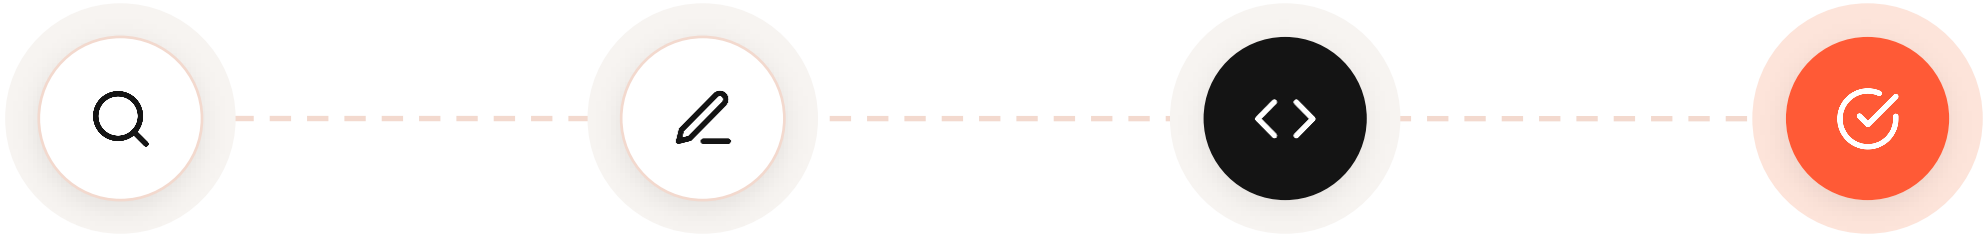

Process Automation

Repetitive manual work replaced with systems that run 24/7.

- Workflow automation
- Reports & alerts
- Tool-to-tool integration

How we build

One clear process for every project.

STEP 01

Discover

We map your current process, tools and pain points before writing a line of code.

STEP 02

Design

Workflows, screens and architecture planned around how your team actually works.

STEP 03

Build

Built and tested in a shared workspace, with demos at every milestone.

STEP 04

Launch & Support

Deployed, your team trained, and we stay on as your system grows.

Shared project workspace

Weekly progress updates

Clear milestones & sign-offs

Industries we serve

Systems shaped around how each industry actually runs.

01

Manufacturing

Production, stock and purchase connected, from raw material to dispatch.

Production | Inventory | Purchase

02

Real Estate

Portal and ad leads tracked to site visit, booking and payment.

Leads | Site visits | Bookings

03

Retail & E-commerce

Store and online orders, stock and billing in one view.

Orders | Stock | Billing

04

Healthcare & Pharma

Batch and expiry tracking, distributor orders and compliance.

Batches | Distributors | Compliance

05

Logistics & Distribution

Dispatch, routes and delivery status tracked without phone calls.

Dispatch | Routes | Delivery

06

Education

Admissions, fee collection and student records in one system.

Admissions | Fees | Attendance

Website Development

Service 01

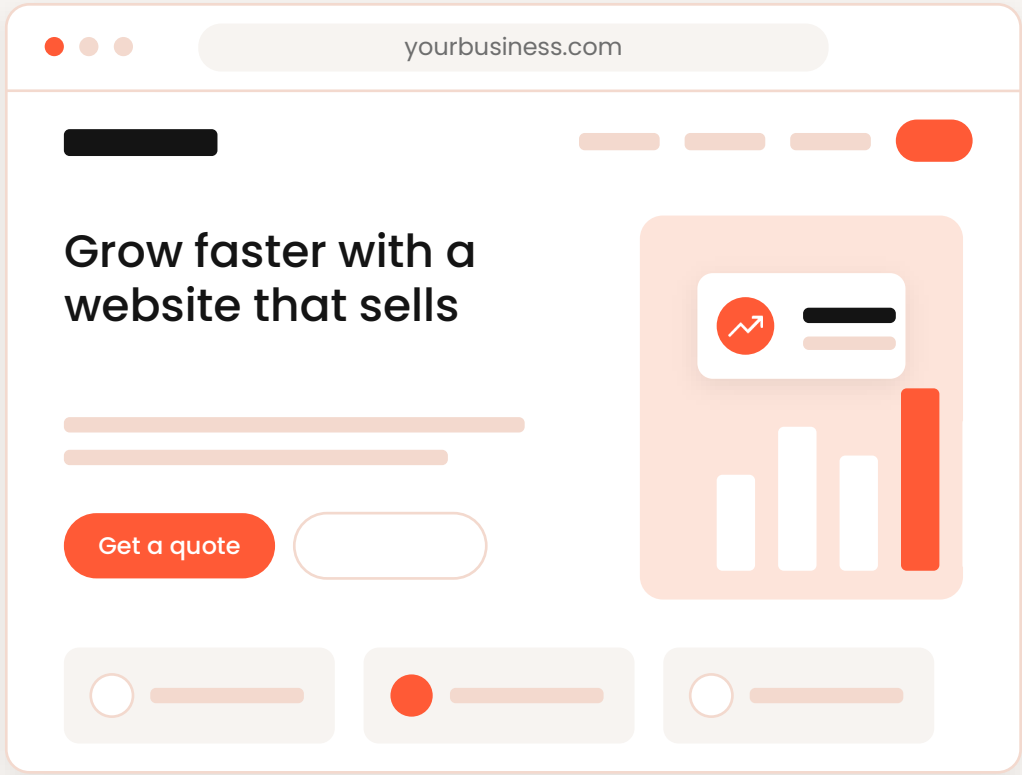

Your website is often the first thing a customer sees. We build fast, modern sites designed to convert — and connect them straight into your CRM.

WHAT WE BUILD

- Business websites
- E-commerce stores
- Landing pages
- Web apps & portals
- Admin dashboards
- CMS & blogs

BUILT WITH

- React
- Next.js
- WordPress
- Shopify
- Node.js

SERVICE 02 · CRM DEVELOPMENT

Custom CRM, built around your sales

Every lead, customer and deal in one place — designed for your sales process, not a generic template.

8 modules · pick what you need, add more as you grow

- Dashboard & Analytics 01
- Lead Management 02
- Contact & Account Management 03
- Sales Pipeline & Deals 04
- Tasks & Follow-ups 05
- Quotations & Invoicing 06
- Marketing Automation 07
- Customer Support & Ticketing 08

Dashboard & Analytics

Your sales performance, live

CRM MODULE 01

A live view of leads, deals and team performance — the first screen your team opens every morning.

WHAT'S INCLUDED

- Real-time KPIs for sales and leads
- Team and individual performance views
- Revenue forecasts by pipeline stage
- Custom widgets for each role
- Exports and scheduled reports

OUTCOME

Decisions made on live numbers, not last month's spreadsheet.

Lead Management

Capture every enquiry

CRM MODULE 02

Capture leads from every channel and route them to the right person the moment they arrive.

WHAT'S INCLUDED

- Auto-capture from website, WhatsApp, ads and email
- Lead scoring and qualification
- Auto-assignment by region or product
- Duplicate detection and merging
- Source and campaign tracking

OUTCOME

No lead sits unanswered — every enquiry gets an owner in seconds.

Contact & Account Management

One profile per customer

CRM MODULE 03

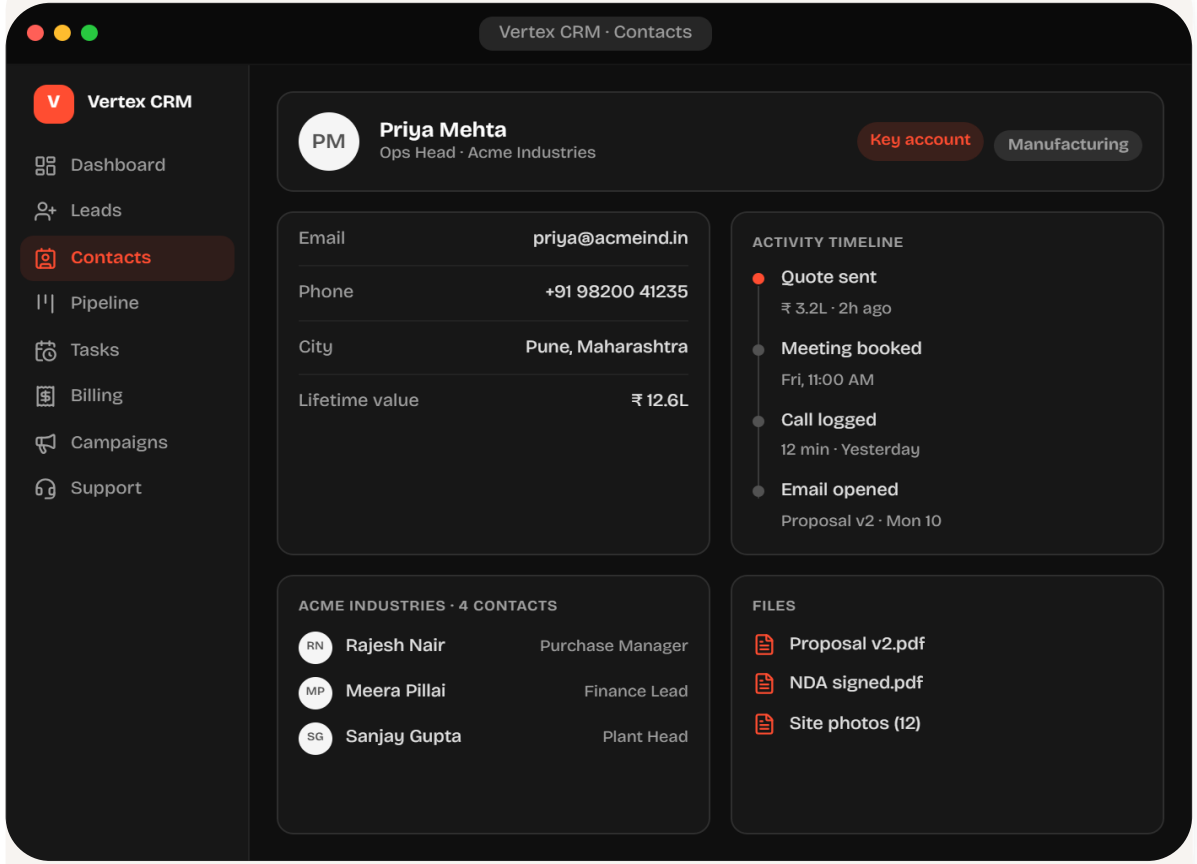

One complete profile for every customer — history, conversations and documents in one place.

WHAT'S INCLUDED

- 360° customer profiles
- Full communication history
- Company accounts with multiple contacts
- Notes, files and custom fields
- Segments and tags

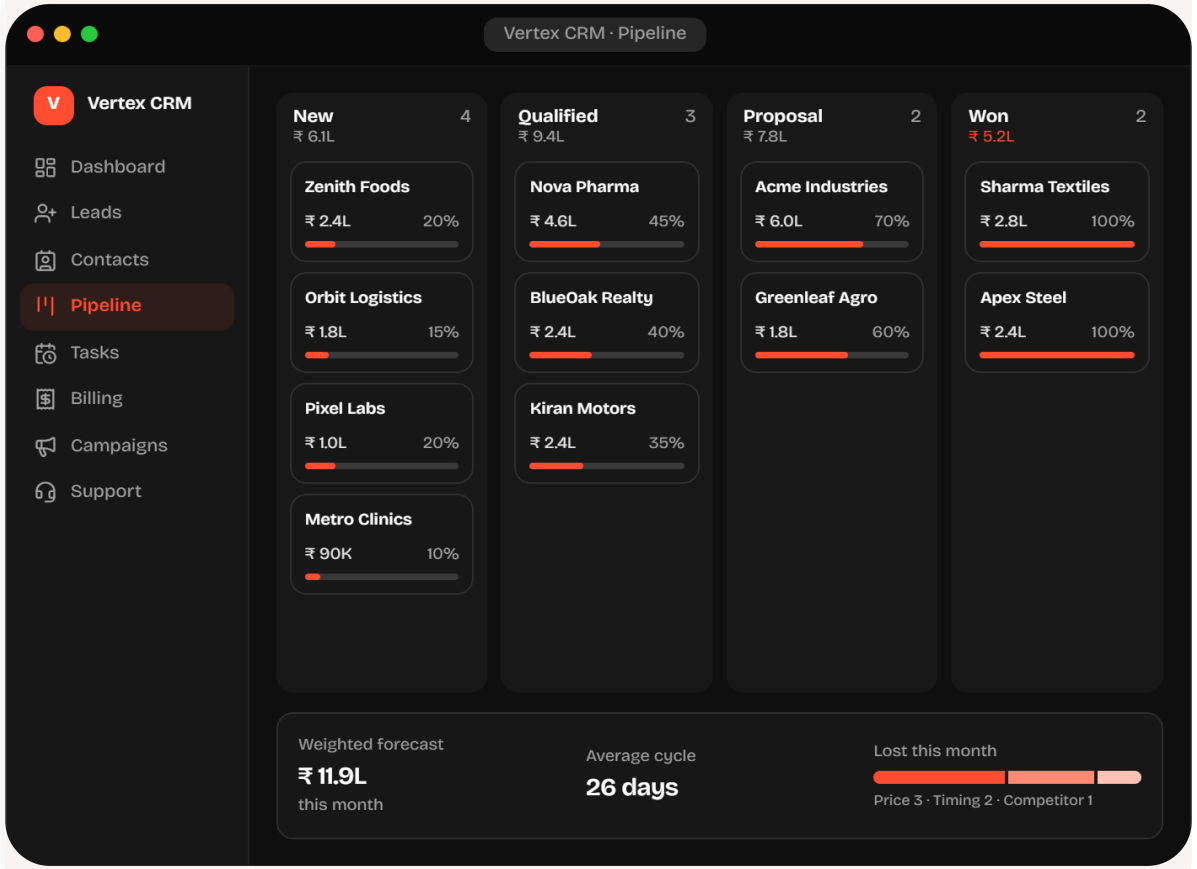

OUTCOME

Anyone on your team can pick up a conversation with full context.

Sales Pipeline & Deals

See what's closing

CRM MODULE 04

A visual pipeline showing every deal, its value and exactly what needs to happen next.

WHAT'S INCLUDED

- Drag-and-drop deal stages
- Custom pipelines per product or team
- Deal values and win probability
- Stage-based automations
- Lost-deal reason tracking

OUTCOME

Clear visibility on what's closing this month — and what's stuck.

Tasks & Follow-ups

Nothing slips through

CRM MODULE 05

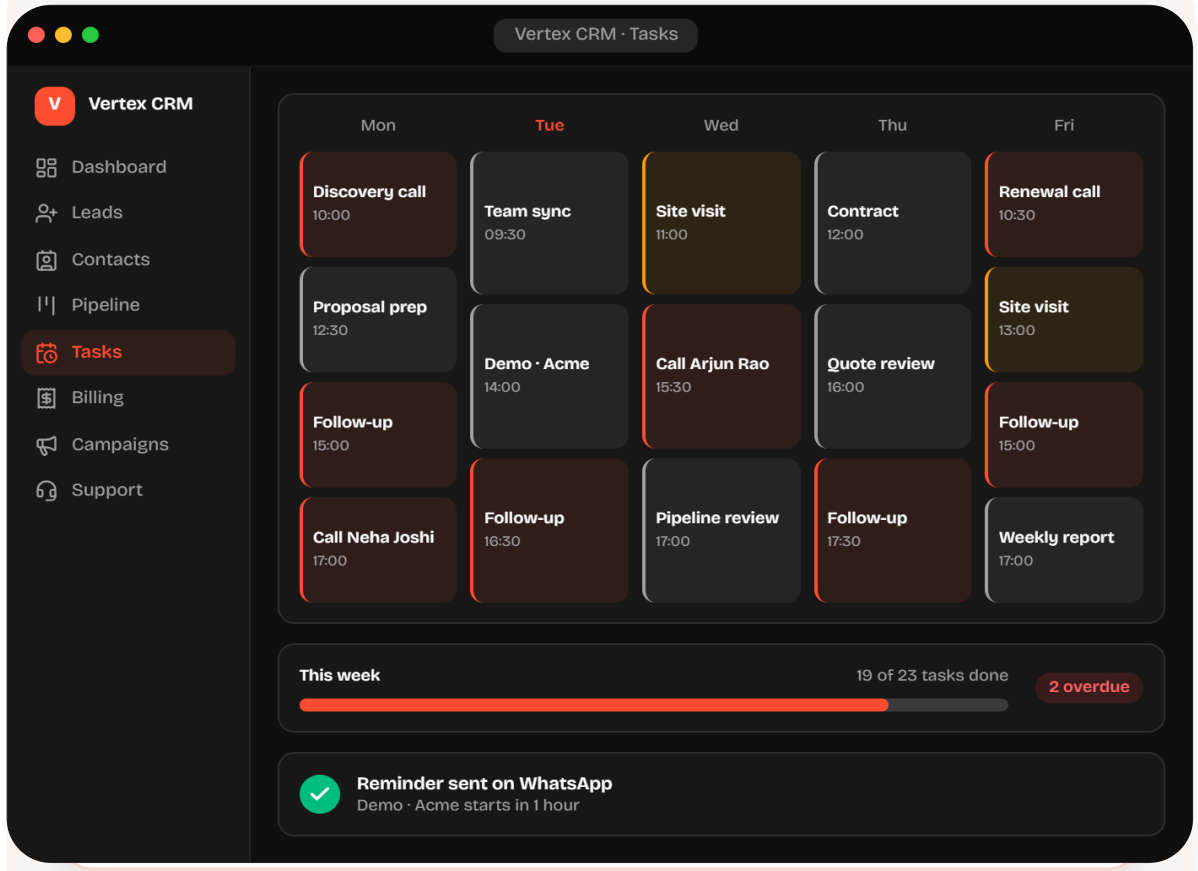

Calls, meetings and reminders scheduled automatically, so nothing falls through the cracks.

WHAT'S INCLUDED

- Auto-created follow-up tasks
- Shared team calendar
- Call and meeting logging
- Reminders on WhatsApp and email
- Overdue task alerts

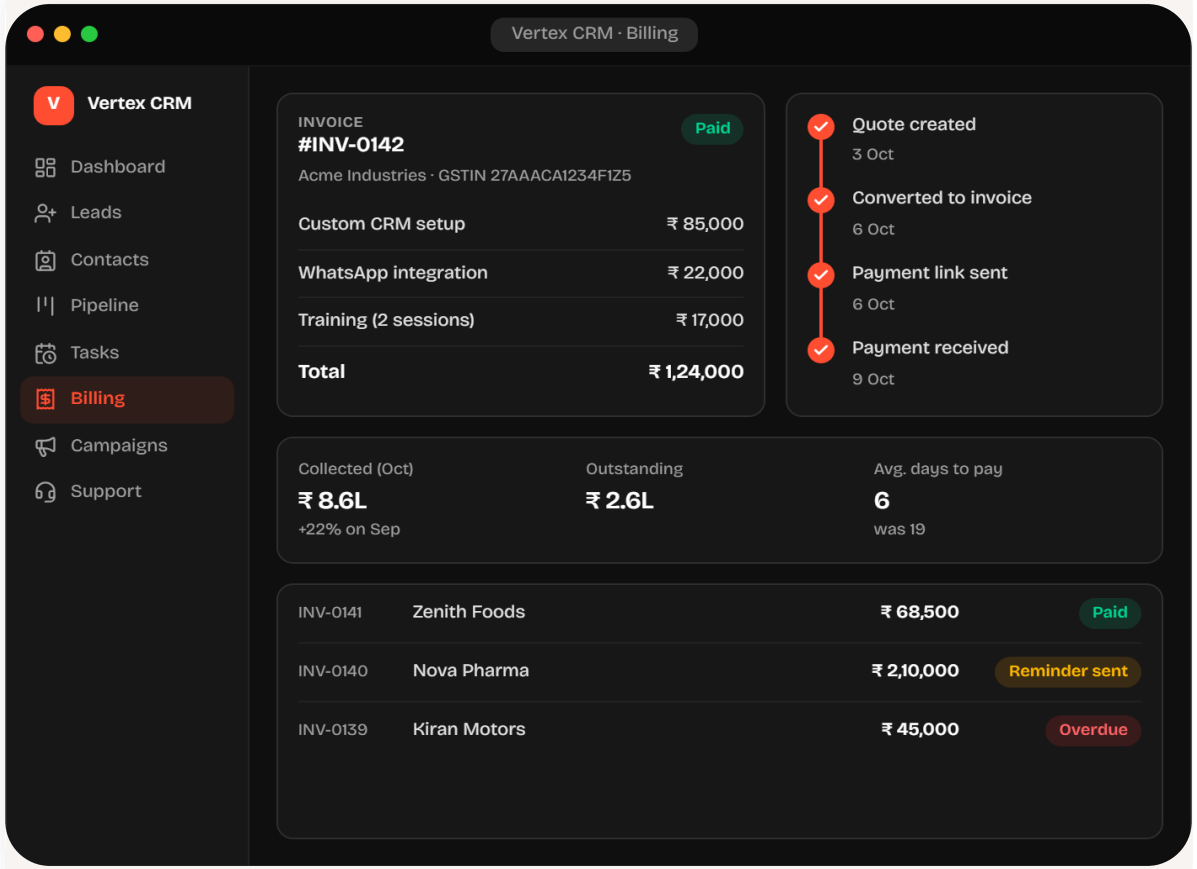

OUTCOME

Follow-ups happen on time, every time — without anyone chasing.

Quotations & Invoicing

Quote to cash, faster

CRM MODULE 06

Turn a deal into a quote, and a quote into an invoice, in a few clicks.

WHAT'S INCLUDED

- Branded quote templates
- One-click quote-to-invoice
- GST-ready invoicing
- Payment links and status tracking
- Automatic payment reminders

OUTCOME

Faster billing and fewer missed payments.

Marketing Automation

Nurture on autopilot

CRM MODULE 07

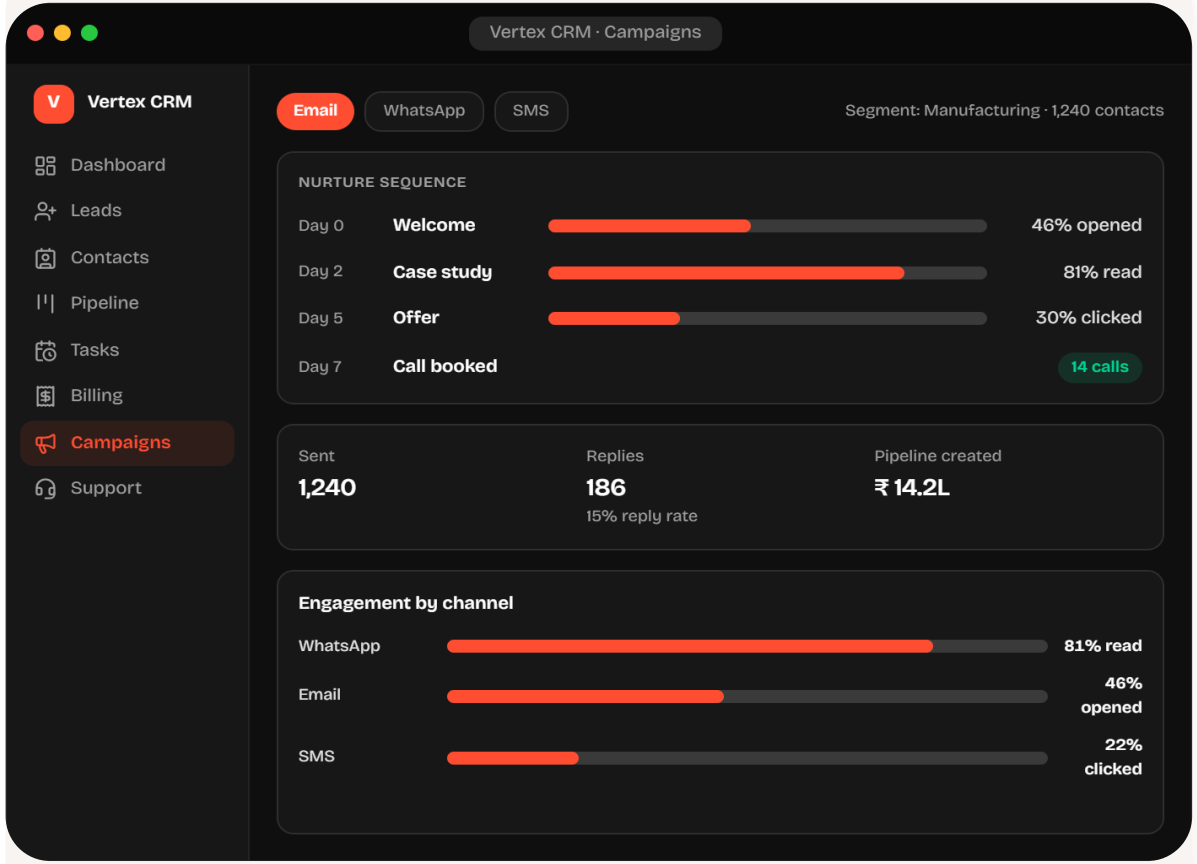

Run email, WhatsApp and SMS campaigns from the same system that holds your customer data.

WHAT'S INCLUDED

- Email and WhatsApp campaigns
- Drip and nurture sequences
- Audience segmentation
- Open, click and reply tracking
- Landing page and form integration

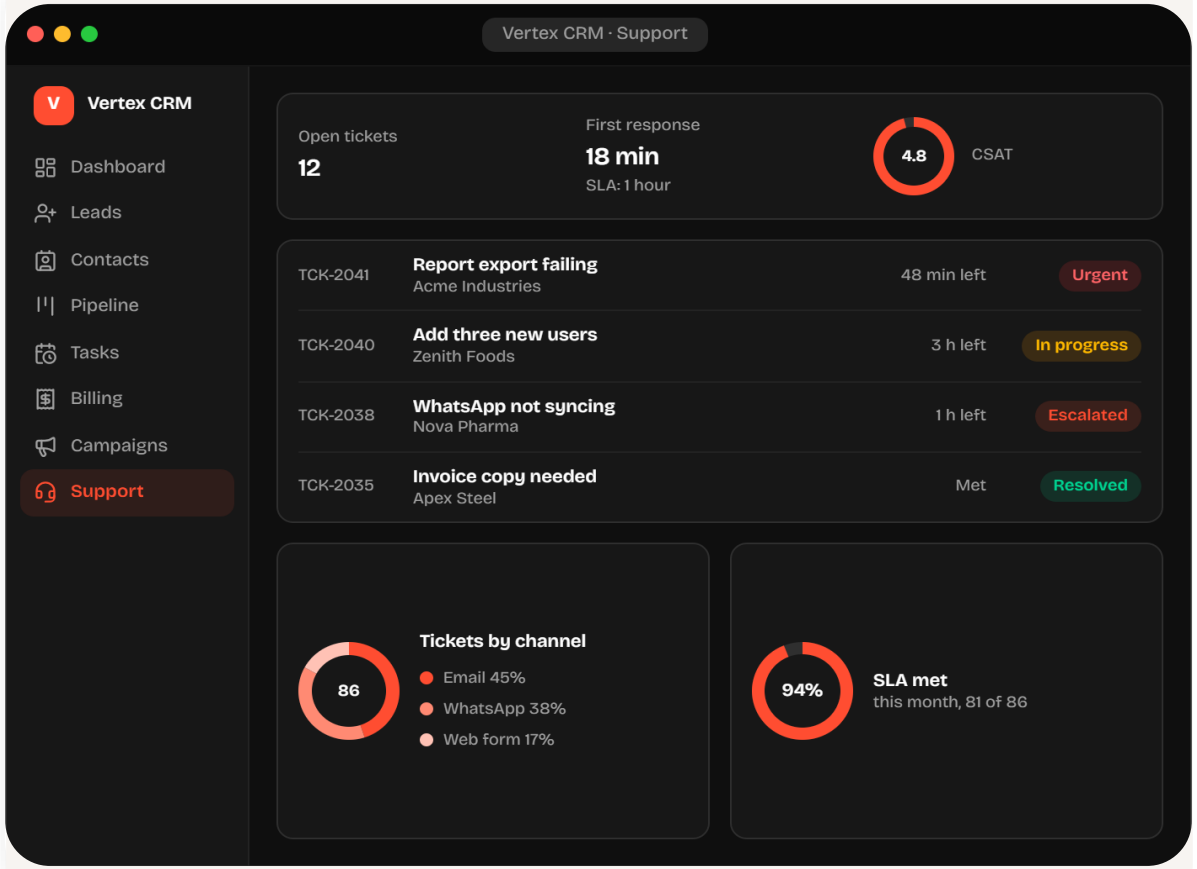

OUTCOME

Leads are nurtured automatically until they're ready to buy.

Customer Support & Ticketing

Every request resolved

CRM MODULE 08

Every customer request logged, assigned and tracked until it's resolved.

WHAT'S INCLUDED

- Multi-channel ticket capture
- Priority and SLA tracking
- Auto-assignment to agents
- Knowledge base and canned replies
- Customer satisfaction surveys

OUTCOME

Faster responses and a clear record of every customer issue.

SERVICE 03 · ERP SYSTEMS

One ERP for your entire operation

Inventory, finance, HR, payroll and production connected in one system — so every department works from the same data.

10 modules · pick what you need, add more as you grow

- Inventory Management 01
- Purchase & Procurement 02
- Sales & Order Management 03
- Finance & Accounting 04
- HR Management 05
- Payroll & Attendance 06
- Manufacturing & Production 07
- Warehouse & Supply Chain 08
- Project Management 09
- Reports & Business Intelligence 10

Inventory Management

Live stock, every location

ERP MODULE 01

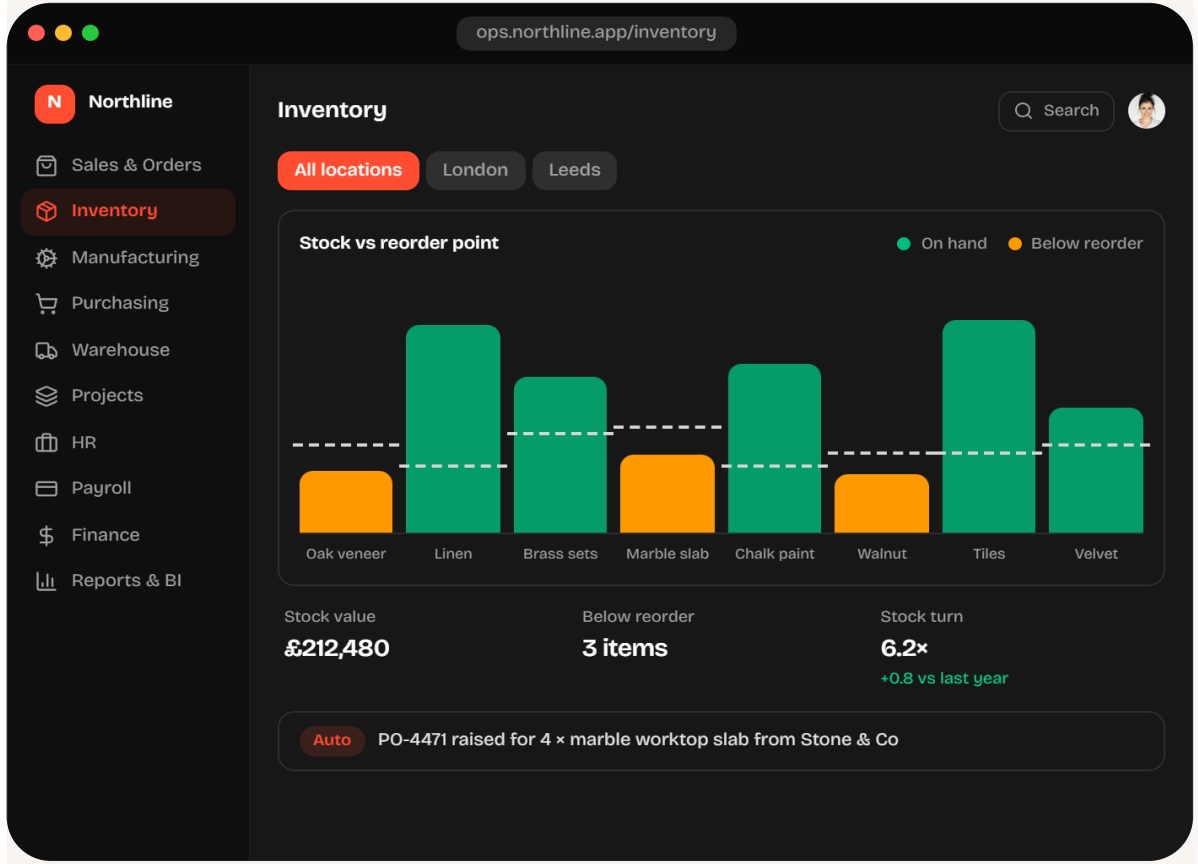

Real-time stock levels across every product, batch and location.

WHAT'S INCLUDED

- Live stock across all locations
- Low-stock alerts and auto-reorder
- Batch, serial and expiry tracking
- Barcode and QR scanning
- Stock valuation reports

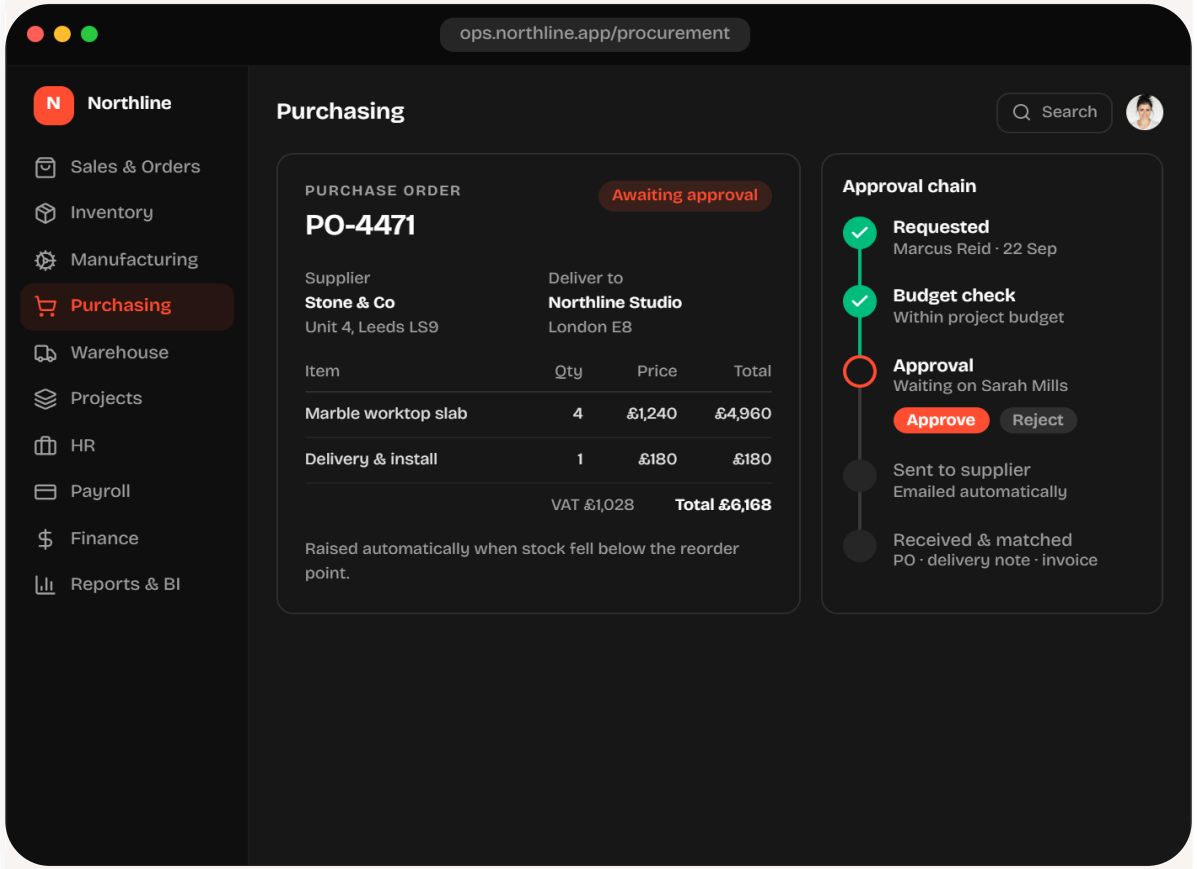

OUTCOME

Never overstock, never run out.

Purchase & Procurement

Request to receipt

ERP MODULE 02

From purchase request to goods received — every step approved and recorded.

WHAT'S INCLUDED

- Purchase requests and approvals
- Vendor management and comparison
- Purchase orders and goods receipt (GRN)
- Vendor bills matched to POs
- Spend analytics

OUTCOME

Controlled spending with a full audit trail.

Sales & Order Management

Order to delivery

ERP MODULE 03

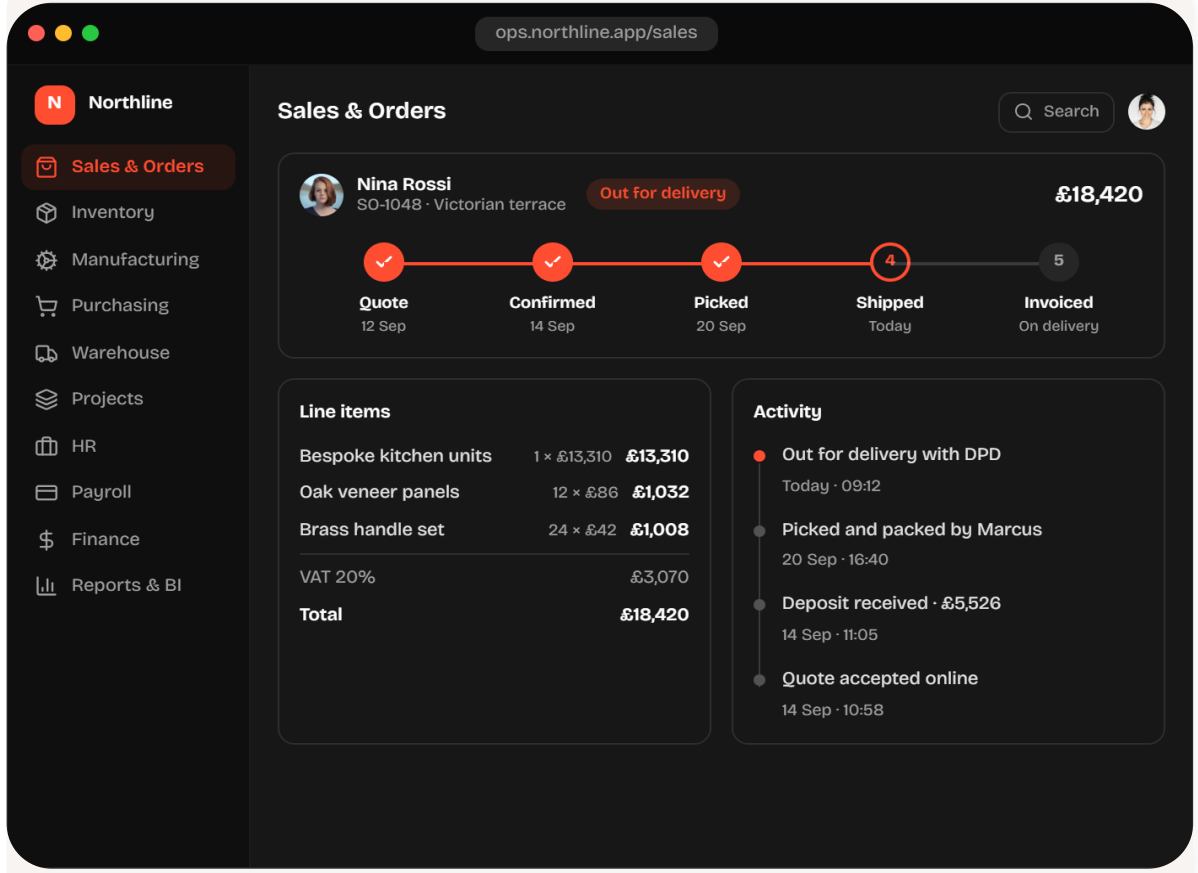

Track every order from confirmation to delivery in one place.

WHAT'S INCLUDED

- Quotes, sales orders and invoices
- Order status tracking
- Pricing, discounts and schemes
- Dispatch and delivery tracking
- Returns management

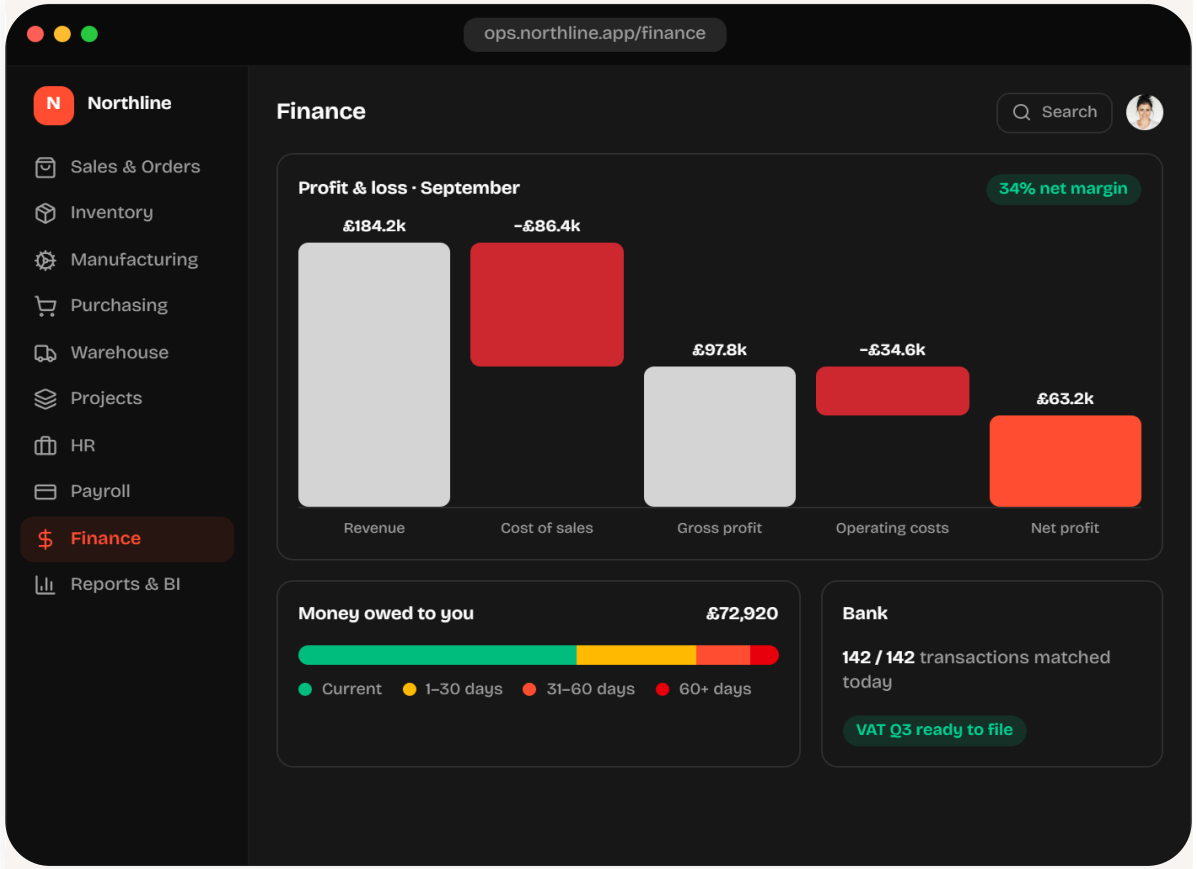

OUTCOME

Accurate order updates — and no more 'where's my order?' calls.

Finance & Accounting

Books that keep themselves

ERP MODULE 04

Ledgers, payables, receivables and tax — connected to every transaction in the business.

WHAT'S INCLUDED

- General ledger and journals
- Accounts payable and receivable
- GST and tax compliance
- Bank reconciliation
- P&L, balance sheet and cash flow

OUTCOME

Books that update as the business runs.

HR Management

Hire to retire

ERP MODULE 05

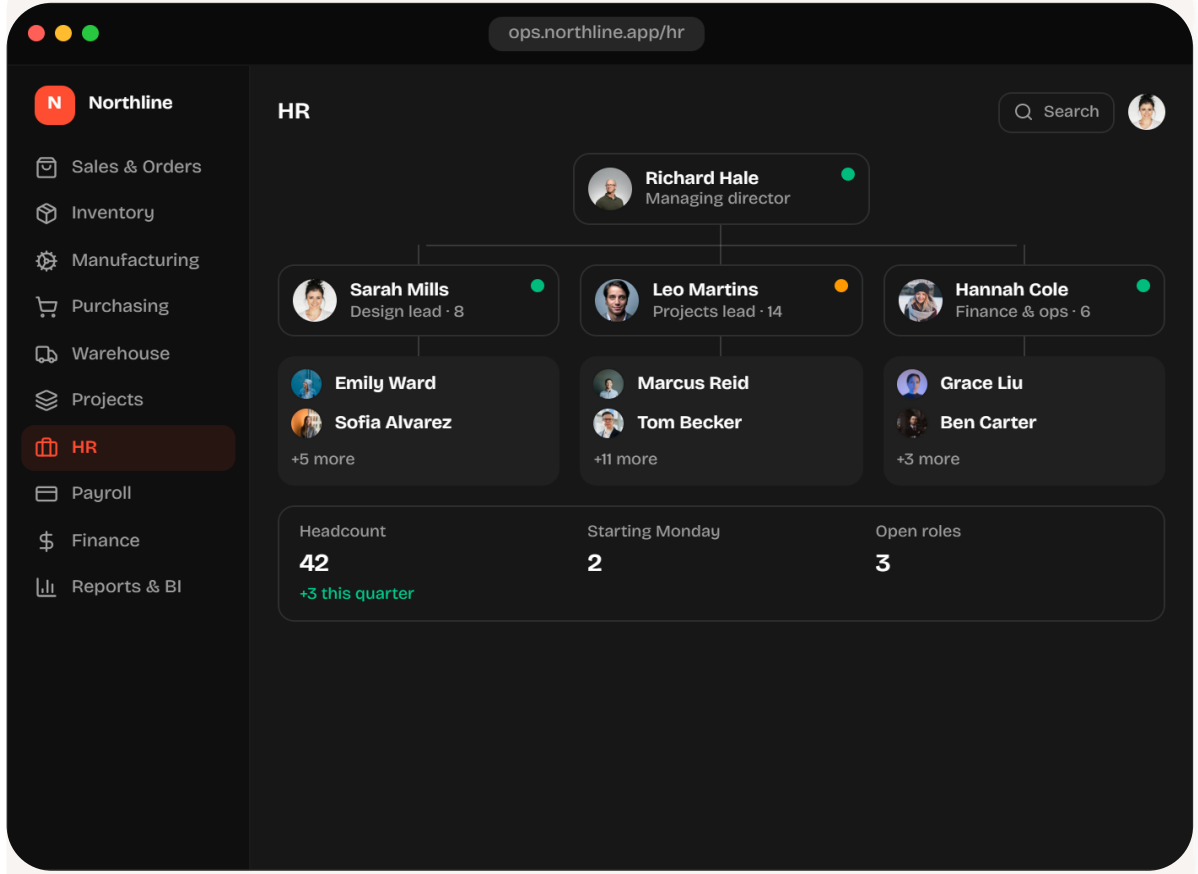

Every employee record, from hiring to exit, managed in one system.

WHAT'S INCLUDED

- Employee database and documents
- Recruitment and onboarding
- Org structure and roles
- Leave management
- Performance reviews

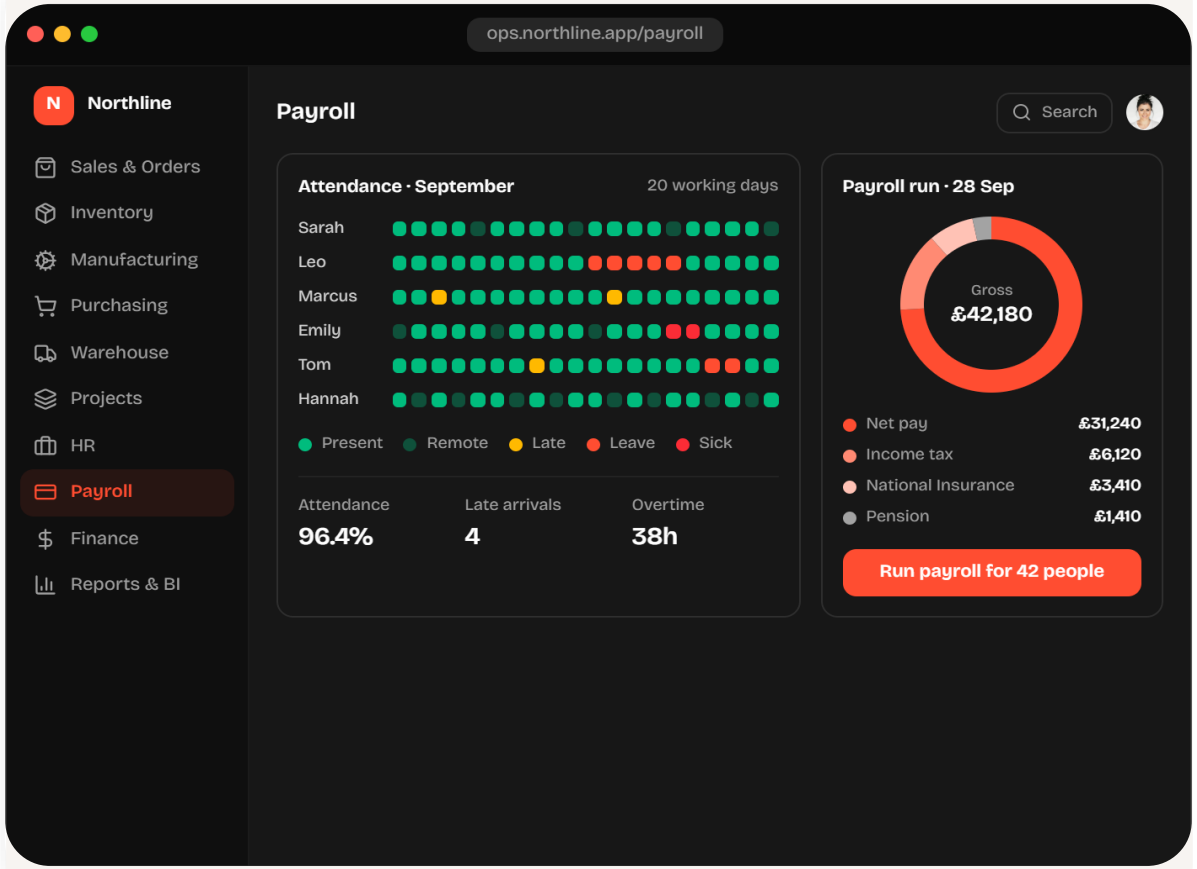

OUTCOME

Less HR paperwork, more time for people.

Payroll & Attendance

Salaries on autopilot

ERP MODULE 06

Attendance flows straight into payroll — salaries calculated and payslips generated automatically.

WHAT'S INCLUDED

- Biometric and mobile attendance
- Shift and overtime rules
- Automated salary calculation
- PF, ESI and TDS compliance
- Payslips and employee self-service

OUTCOME

Payroll done in hours, not days.

Manufacturing & Production

Plan, build, check

ERP MODULE 07

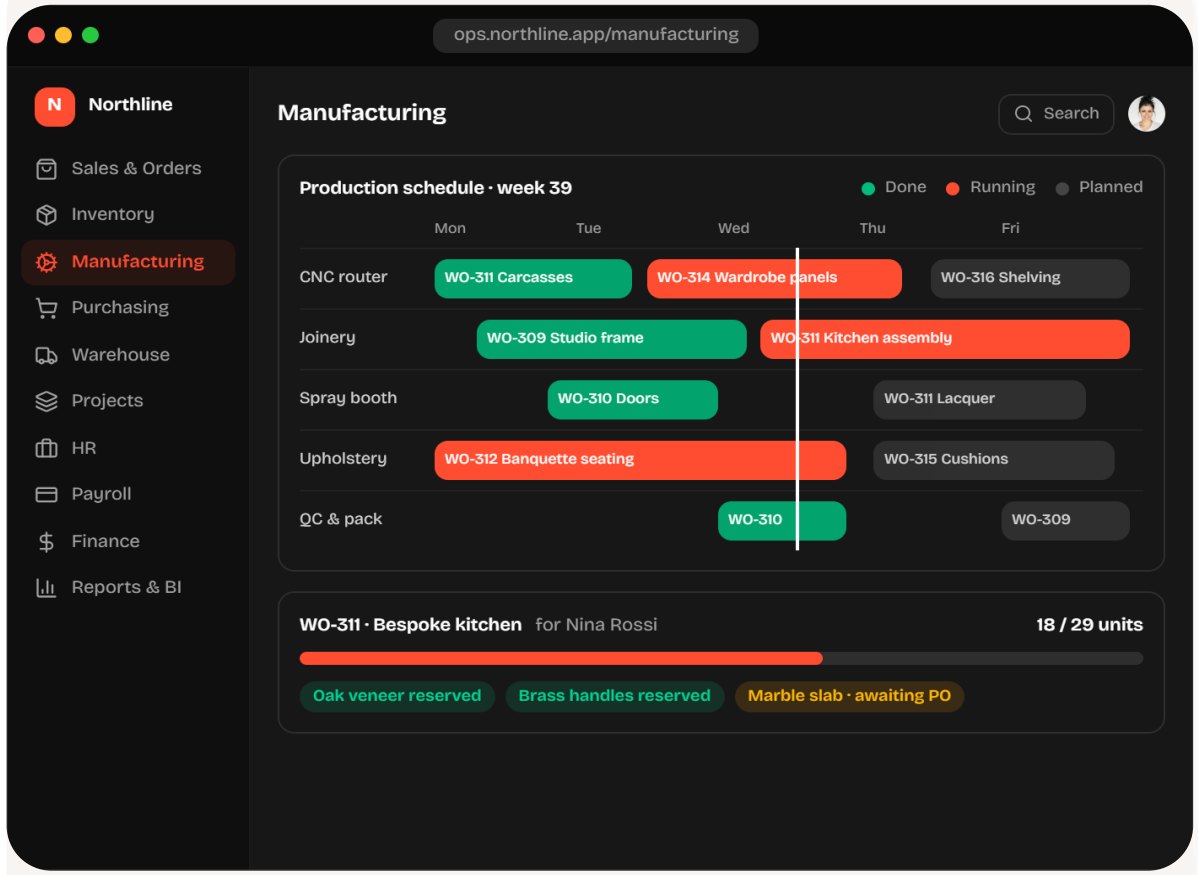

Plan production, track work orders and control quality on the shop floor.

WHAT'S INCLUDED

- Bill of materials (BOM)
- Production planning and scheduling
- Work order tracking
- Raw material consumption
- Quality checks

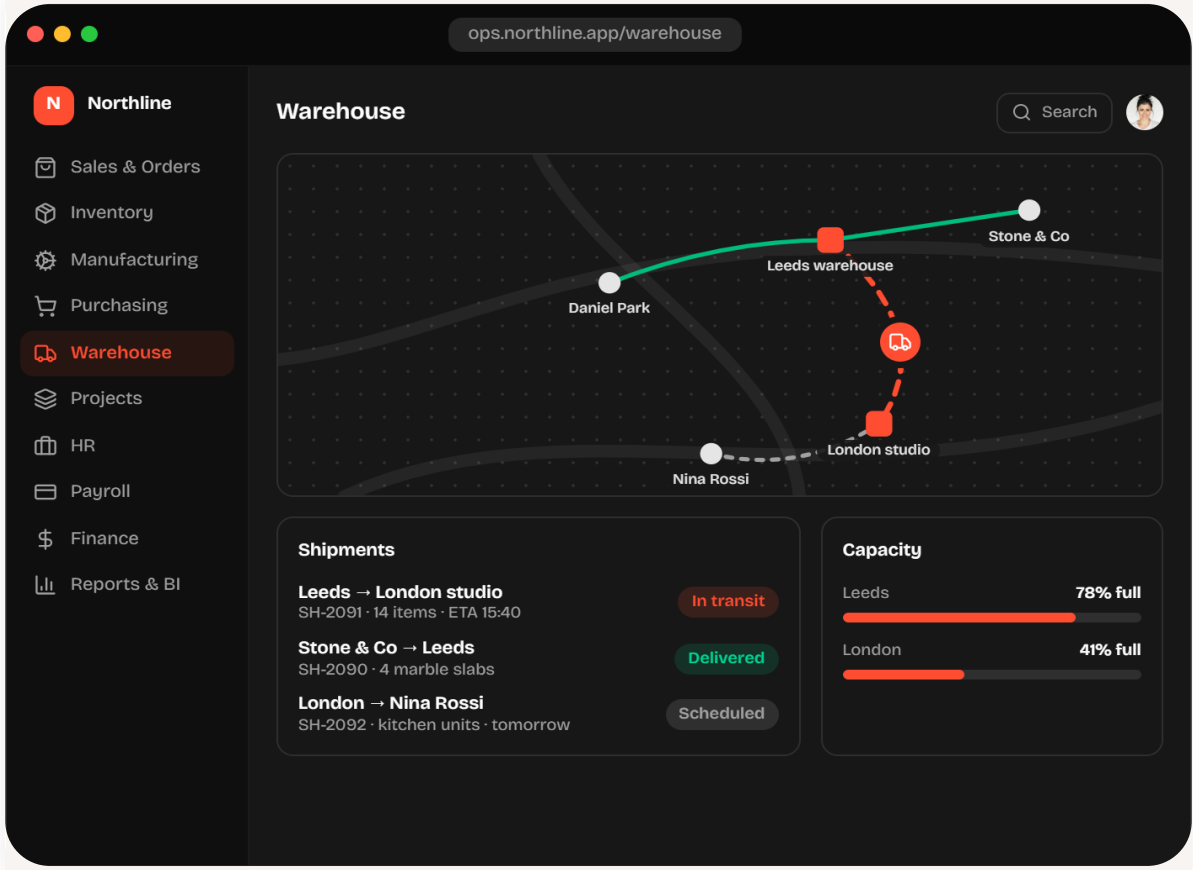

OUTCOME

Production plans that match real capacity and stock.

Warehouse & Supply Chain

Every rack, every move

ERP MODULE 08

Know what's in every rack and move stock between locations without guesswork.

WHAT'S INCLUDED

- Multi-warehouse management
- Bin and rack locations
- Pick, pack and dispatch
- Stock transfers between sites
- Shipment tracking

OUTCOME

Faster dispatch with fewer picking errors.

Project Management

On time, on budget

ERP MODULE 09

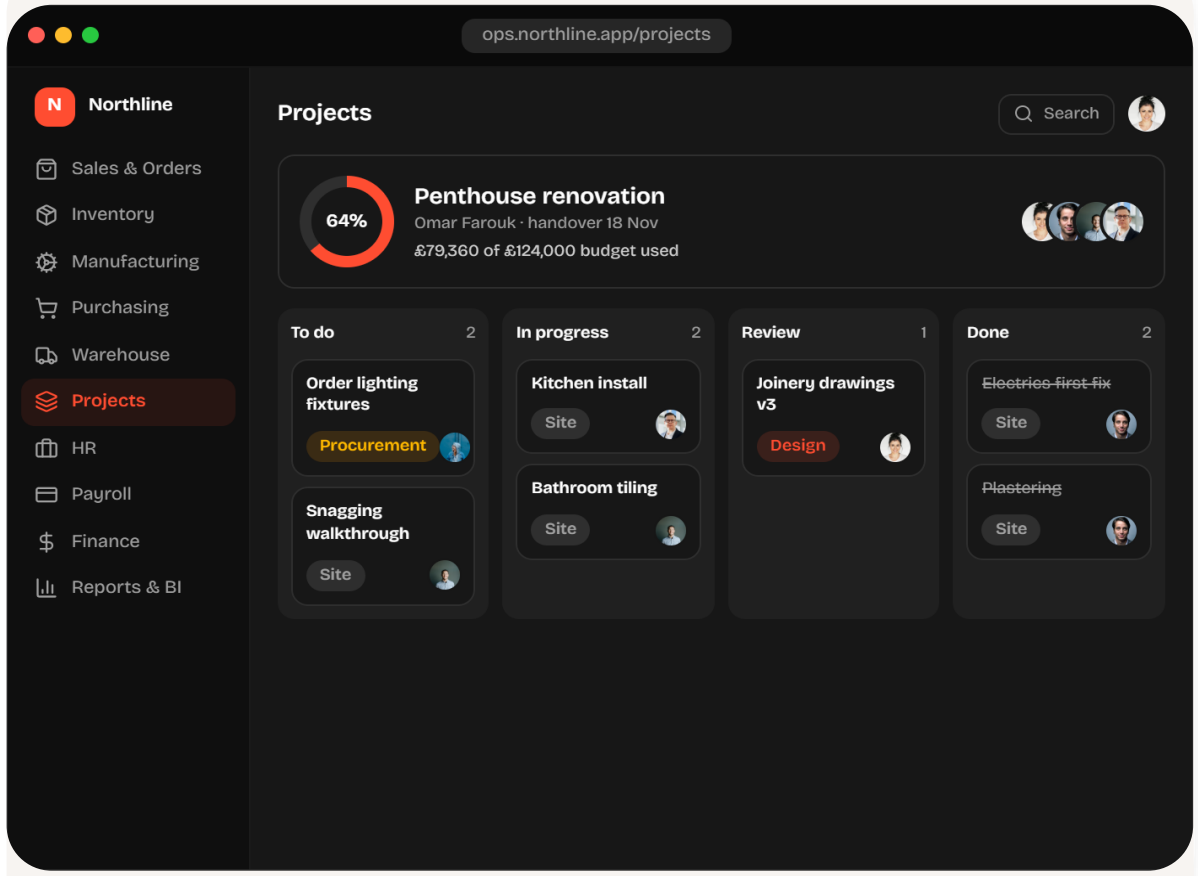

Plan projects, assign work and track time and costs against budget.

WHAT'S INCLUDED

- Projects, milestones and tasks
- Gantt and timeline views
- Timesheets
- Budget vs actual costing
- Client billing by project

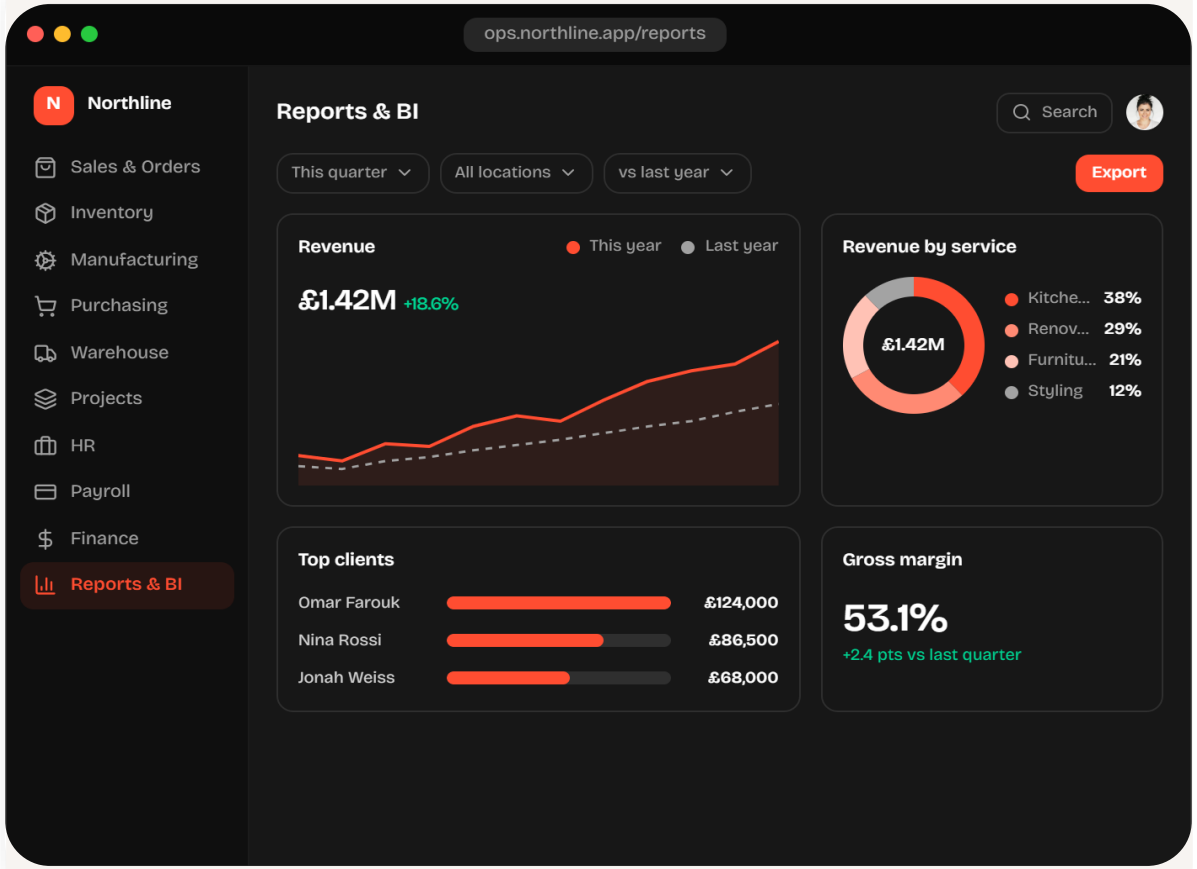

OUTCOME

Projects delivered on time and within budget.

Reports & Business Intelligence

The whole business at a glance

ERP MODULE 10

Every department's data in one dashboard, so leadership sees the whole business at a glance.

WHAT'S INCLUDED

- Cross-department dashboards
- Custom reports and filters
- Scheduled email reports
- Drill-down analytics
- Role-based access

OUTCOME

One version of the truth for the whole company.

Business Process Automation

Service 04

TRIGGER

New enquiry on website

Something happens

A form is filled, an order lands or a payment is due.

SYSTEM DECISION

Lead scored & routed

The system decides

It checks your CRM, stock and rules, then picks the next step.

ACTION

WhatsApp + task created

The work gets done

Records update, messages go out and your team is notified.

AUTOMATIONS WE BUILD MOST OFTEN

Lead capture & routing

Every form, ad and chat lands in your CRM

Payment reminders

Invoices chased automatically until paid

WhatsApp & email follow-ups

Timely messages without manual sending

Automatic reports

Daily and weekly reports in your inbox

Reorder alerts

Purchase requests raised at low stock

Employee onboarding

Documents, access and tasks in one flow

THE SCALE OF WHAT'S COMING

Roughly 78% of multinational companies now run custom platforms for their ERP, CRM and process automation.
